AUTHOR INDEX
Volume 7 (1967)

Abiko, Sh. See Kunugi, T.

Ado, K. See Nobuoka, S.

Aerov, M. E., Boyarchuk, P. G., Bystrova, T. A. Pozin, L. S., and Lagover, I.I.
Investigation of the hydraulics of sieve trays at high liquid loadings, *Khim. i Neft. Mashinostr.*, No. 5 (1966), *Intern. Chem. Eng.* 7, No. 2, p. 235 (1967).

Aerov, M. E., Vostrikova, V. N., and Gurovich, R. E.
A study of the process of rectification drying of hydrocarbons, *Khim. Prom.*, No. 4 (1966), *Intern. Chem. Eng.* 7, No. 2, p. 279 (1967).

Akopyan, L. A., Rudova, G. A., Morozov, N. A., and Klimenko, V. V.
Process driving force in fluidized-bed equipment, *Khim. Prom.*, No. 9 (1966), *Intern. Chem. Eng.* 7, No. 3, p. 418 (1967).

Alimov, R. Z.
Convective mass transfer during evaporative cooling with an intensely heated surface and two-phase vortex flow, *Inzh.-Fiz. Zh.*, No. 5 (1967), *Intern. Chem. Eng.* 7, No. 4, p. 720 (1967).

Almashev, B. See Rozhdestvenskaya, Z. B.

Amano, A. See Tanji, H.

Ambroz, L. See Kresta, J.

Anikin, A. G. See Avramenko, N. V.

Asinovskii, E. I. and Kirillin, A. V.
Experimental determination of the thermal conductivities of argon plasmas, "International Symposium on the Properties and Applications of Low-temperature Plasmas at the 20th International Congress on Theoretical and Applied Chemistry," Moscow (1967), *Intern. Chem. Eng.* 7, No. 2, p. 281 (1967).

Avdonin, Yu. A., Olevskii, V. M., and Popov, D. M.
Investigation of mass transfer in tubes with irrigated walls with counterflow of gas, *Khim. Prom.*, No. 11 (1966), *Intern. Chem. Eng.* 7, No. 2, p. 258 (1967).

Avramenko, N. V., Dugacheva, G. M., and Anikin, A. G. A. G.
A study of the dependence of the effective distribution coefficient on the rate of diffusion in the zone melting process, *Vestnik Moskovskogo Universiteta*, No. 3 (1966), *Intern. Chem. Eng.* 7, No. 1, p. 1 (1967).

Baan, A. See Czajlik, I.

Badalov, A. A. and Khasaev, A. M.
Structural-mechanical properties of foam, *Izv. Vyssh. Uchebn. Zaved., Neft i Gaz*, No. 5 (1966), *Intern. Chem. Eng.* 7, No. 3, p. 421 (1967).

Bairamov, R. See Baum, V. A.

Baryshev, Yu. N. See Nikolaev, V. S.

Bashkirova, S. G. See Zinov'eva, A. P.

Baum, V. A., Bairamov, R., and Toiliev, K.
Industrial calculation of the unsteady-state thermal regime in glass-enclosed solar evaporators, *Izv. AN Turkm. SSR, Ser. Fiziko-Tekh. Khim. i Geolog. Nauk*, No. 2 (1967), *Intern. Chem. Eng.* 7, No. 4, p. 569 (1967).

Bel'tsov, B. A.
Mathematical description of the platforming process, *Khim. i Tekhnol. Topliv i Masel*, No. 8 (1966), *Int. Chem. Eng.* 7, No. 4, p. 680 (1967).

Blasiak, E. and Haba, A.
Sinter formation in a fluidized bed during a process involving an exothermic reaction, *Chemia Stosowana*, No. 4, IB (1967), *Intern. Chem. Eng.* 7, No. 4, p. 614 (1967).

Blyakher, I. G., Zhivaikin, L., and Yurovskaya, N. A.
Investigation of hydrodyamics and mass transfer in equipment with movable packing, *Khim. i Neftyanoe Mashinostr.*, No. 2 (1967), *Intern. Chem. Eng.* 7, No. 3, p. 485 (1967).

Blyumberg, E. A., Bobolev, A. V., Bulygin, M. G., and Emanuel, N. M.
The effect of the nature of the reactor surface on the rate and course of liquid-phase propylene oxidation, *Neftekhimiya*, No. 1 (1967), *Intern. Chem. Eng.* 7, No. 3, p. 450 (1967).

Bobolev, A. V. See Blyumberg, E. A.

Boronin, V. S. See Poltorak, O. M.

Boyadzhiev, Khr. See Elenkov, D.

Boyarchuk, P. G. See Aerov, M. E.

Bozhov, I. and Elenkov, D.
The influence of surfactants on mass transfer, determined by the liquid boundary layer on plates without downcomers, *Izv. na Instituta po Obshcha i Neorganichna Khimiya* 4 (1966), *Intern. Chem. Eng.* 7, No. 2, p. 316 (1967).

Bruk, O. L.
Calculation and investigation of multistage sequential washing of sludge, *Khim. Prom.*, No. 3 (1967), *Intern. Chem. Eng.* 7, No. 4, p. 629 (1967).

Brzozowski, W., Rida, J., and Mikosy, M.
Introduction of plasma techniques into the chemical

CONTENTS

Vol. 7, No. 1–January 1967

N. V. Avramenko, G. M. Dugacheva, and A. G. Anikin: A study of the dependence of the effective distribution coefficient on the rate of diffusion in the zone melting process, Vestnik Moskovskogo Universiteta, No. 3 (1966), Soviet Union. 1

V. G. Gutsalyuk, E. I. Sdobnov, and E. A. Yatsenko: Investigation of the structure and properties of high-molecular compounds from the products of petroleum refining. Surface activity of asphaltenes from cracking residue at a hydrocarbon-water interface, Izvestiya Akademii Nauk Kazakhskoi SSR, Seriya Khimicheskaya, No. 1 (1966), Soviet Union. 5

Z. B. Rozhdestvenskaya, B. F. Petrov, A. B. Fasman, and B. Almashev: Investigation of the phase composition of a Raney nickel-molybdenum catalyst, Izvestiya Akademii Nauk Kazakhskoi, SSR, Seriya Khimicheskaya, No. 1 (1966), Soviet Union. 9

G. G. Safarov: Boundary layer suction in the flow of a two-component fluid around a body, Izvestiya Akademii Nauk Azerbaidzhanskoi SSR, Seriya Fiziko - Tekhnicheskikh i Matematicheskikh Nauk, No. 1 (1966), Soviet Union. 14

Kh. M. Minachev, Ya. I. Isakov, V. I. Garanin, L. I. Piguzova, and A. S. Vitukhina: Alkylation of benzene on synthetic zeolites at atmospheric pressure, Neftekhimiya, No. 1 (1966), Soviet Union. 18

M. E. Levinter, G. M. Panchenkov, and M. A. Tanatarov: Diffusion factors in coke formation on a silica-alumina catalyst, Khimiya i Tekhnologiya Topliv i Masel, No. 3 (1966). 23

K. Hájek and E. Krejcar: The formation and aging of air-dried alkyd resin films, Chemický Průmsyl, No. 5 (1966), Czechoslovakia. 27

J. Siedlewski and S. Trawinski: The mechanism of catalytic oxidation on activated carbon. VIII. The relationship between the concentration of free radicals of carbon and its catalytic activity in the oxidation of H_2S and SO_2, Roczniki Chemii, Annales Societatis Chimicae Polonorum, No. 6 (1966), Poland. 35

M. K. Krasil'nikova and K. V. Topchieva: Catalytic properties of yttrium oxide, Vestnik Moskovskogo Universiteta, No. 2 (1966), Soviet Union. 40

V. Yu. Gankin, N. Y. Gordina, D. P. Krinkin, D. M. Rudkovskii, and A. G. Trifel: Hydroformylation in the gas phase, Khimiya i Tekhnologiya Topliv i Masel, No. 4 (1966), Soviet Union. 45

J. Ciborowski and R. Pohorecki: The effect of electrical discharges on sublimation condensation, Chemia Stosowana 2B (1966), Poland. 48

A. V. Solve'ev, E. I. Preobrazhenskii, and P. A. Semenov: Hydraulic resistance in two-phase flow, Khimicheskaya Promyshlennost, No. 8 (1966), Soviet Union. 59

J. H. Lee: Statistical mechanical theory of adsorption life, Hwahak Kwa Hwakak Kongup 9, No. 5 (1965), North Korea. 63

G. A. Potlova and D. V. Sokol'skii: Hydrogenation of phosphatides over palladium catalysts in solvents, Izvestiya Akademii Nauk Kazakhskoi SSR, Seriya Khimicheskaya, No. 1 (1966), Soviet Union. 72

R. A. Bychkov and M. P. Zverev: Fibers from mixtures of polypropylene and poly-2-vinyl-pyridine, Khimicheskie Volokna, No. 2 (1966), Soviet Union. 76

Kyung-Jong Kim, Chun Do-Choo, Keum-San Chun, and Sam-Shik Choo: Heat and mass transfer in fixed and fluidized bed reactors. Huakak Kwa Huakak Kongup (Chemistry and Chemical Industry), No. 3 (1966), North Korea. 79

M. Hruby: Relationship between the dissipation of mechanical energy and heat transfer in agitated vessels, Chemický Průmysl, No. 8 (1966), Czechoslovakia. 86

Kh. M. Minachev, Ya. I. Isakov, and V. I. Garanin: Effect of the nature of the cation on the catalytic activity of Zeolite Y in the alkylation of benzene with propylene, Neftekhimiya, No. 1 (1966), Soviet Union. 91

A. G. Polkovnikova and L. A. Ivanova: Isomerization of propylene oxide, Khimicheskaya Promyshlennost, No. 1 (1966), Soviet Union. 95

M. Sufčák: Preparation of concentrated polychloroprene latexes, Chemický Průmysl, No. 9 (1966), Czechoslovakia. 99

O. N. Tsvetkov, K. D. Korenev, N. M. Karavaev, and S. A. Dmitriev: Alkylation of phenols with higher olefins, Part 1, Khimicheskaya Promyshlennost, No. 4 (1966), Soviet Union. 104

O. N. Tsvetkov, K. D. Korenev, N. M. Karavaev, and S. A. Dmitriev: Alkylation of phenols with higher olefins, Part 2, Khimicheskaya Promyshlennost, No. 5 (1966), Soviet Union. 113

R. Krupiczka: Analysis of thermal conductivity in

granular materials, Chemia Stosowana 2B (1966), Poland. **122**

S. A. Yantovskii, I. Yu. Sidorina, and M. V. Chernyak: Conditions of safe oxidation of toluene by atmospheric oxygen, Neftekhimiya, No. 1 (1966). **144**

I. A. Gil'denblat, N. M. Gurova, and V. M. Ramm: The effect of wetting distribution and packed column height on the absorption efficiency in columns with various ring packings. Khimicheskaya Promyshlennost, No. 8 (1966), Soviet Union. **149**

K. K. Voronin, Z. M. Gol'dfarb, A. V. Donskoi, S. V. Dresvin, V. S. Klubnikin, and P. N. Rogovtsev: Certain characteristics of a high-frequency induction gaseous discharge and features of its application to the synthesis of refractory dielectric crystals, "International Symposium on the Properties and Application of Low-Temperatures Plasma, 20th International Congress on Theoretical and Applied Chemistry," Moscow (1965), Soviet Union. **154**

I. Michiyoshi, K. Shirataki, and K. Takitani: The steam volume fraction in two-phase flow, Nippon Genshiryoku Gakkaishi (J. Soc. Atomic Energy, Japan), No. 1 (1966), Japan. **159**

H. Ueda and S. Shida: Reactivity of free radicals formed from irradiated solid high polymers. A method of classification of high polymers, Kogyo Kagaku Zasshi, No. 8 (1966), Japan. **167**

S. Muroi and S. Sakai: Effect of heat on the hygroscopicity of emulsion films, Kogyo Kagaku Zasshi, No. 5 (1966), Japan. **170**

M. Tasaka and I. Kagawa: Effect of the salt concentration in desalting compartments on the increase of the concentration of salts, Kogyo Kagaku Zasshi, No. 6 (1966), Japan. **176**

Vol. 7, No. 2–April 1967

S. G. Fedorkina, S. Khasan, and G. I. Emel'yanova: Determination of the number of active centers on the surface of a platinum catalyst by the method of poisoning, Vestnik Moskovskogo Universiteta, No. 5 (1966), Soviet Union. **185**

M. A. Kharisov and V. B. Kogan: A distributing device for thin-film evaporation equipment, Khimicheskoe i Neftyanoe Mashinostroenie, No. 11 (1966), Soviet Union. **189**

D. Elenkov and Khr. Boyadzhiev: Hydrodynamics and mass transfer in a nozzleless Venturi absorber. II. Absorption of sulfur dioxide in water and aqueous solutions of surfactants, Izvestiya na Instituta po Obshcha i Neorganichna Khimiya 4 (1966), Bulgaria. **191**

R. V. Sinitsyna and A. D. Stepukhovich: On the problem of the joint influence of the heterogeneity factor s/v and inhibitors on the kinetics and mechanism of the thermal cracking of alkanes, Neftekhimiya, No. 5 (1966), Soviet Union. **194**

V. V. Popov and L. M. Popova: The design of tray-type mass-transfer equipment, Khimiya i Tekhnologiya Topliv i Masel, No. 11 (1966), Soviet Union. **197**

Zh. V. Strel'nikova and V. P. Lebedev: The mechanism of catalytic hydrogenation on monoatomic active centers, Vestnik Moskovskogo Universiteta, No. 5 (1966), Soviet Union. **199**

L. A. Kozdoba and V. A. Zagoruiko: Solution of heat and mass transfer problems by the electrical analogy method, Inzhenerno-Fizicheskii Zhurnal, No. 5 (November) (1966), Soviet Union. **202**

L. F. Kovrizhko, Z. V. Ivanova, V. I. Guseva, K. B. Karmin, L. V. Masagutova, I. F. Sotnikov, Z. N. Korbanova, and T. I. Koshkina: The use of para-hydroxydiphenylamine as an inhibitor in the emulsion polymerization of butadiene-styrene rubbers, Kauchuk i Rezina, No. 11 (1966), Soviet Union. **205**

A. N. Nikolaevskii and R. V. Kucher: Investigation of the process of liquid-phase oxidation of propylene-butene mixtures, Neftekhimiya 5 (1966), Soviet Union. **207**

P. G. Romankov and N. B. Rashkovskaya: Modern drying techniques in the chemical industry, Zhurnal Vesesoyuznogo Khimicheskogo Obshchestva im. D. I. Mendeleeva, No. 1 (1965), Soviet Union. **212**

S. Doubravszky and F. Geleji: Polymerization of caprolactam with a caprolactam hydrochloride catalyst, Magyar Kemikusok Lapja, No. 11 (1966), Hungary. **220**

S. Minc, A. Szymanski, and S. Warycka: Synthesis of acetylene in a plasma jet. Measurements made to determine the most favorable ratio of methane to argon in the plasma jet, "International Symposium on the Properties and Applications of Low-temperature Plasma, 20th International Congress on Theoretical and Applied Chemistry," Moscow (1965), Soviet Union. **228**

N. I. Gel'perin, V. L. Pebalk, E. P. Zaikovskaya, and N. N. Tsyurupa: Determination of interfacial surface area in liquid extraction processes by a sedimentation method, Khimicheskaya Promyshlennost, No. 8 (1966), Soviet Union. **231**

M. E. Aerov, P. G. Boyarchuk, T. A. Bystrova, L. S. Pozin, and I. I. Lagover: Investigation of the hy-

draulics of sieve trays at high liquid loadings, Khimicheskoe i Neftyanoe Mashinostroenie, No. 5 (1966), Soviet Union. **235**

J. Svanda: Cyclone calculations and some design parameters affecting cyclone efficiency. I., Chemicky Prumysl, No. 10 (1966), Czechoslovakia. **238**

M. B. Kats and L. S. Genin: Study of longitudinal mixing of liquid in cocurrent sparged reactors sectionalized with sieve trays, Khimicheskaya Promyshlennost, No. 11 (1966), Soviet Union. **246**

G. V. Dmitrieva, M. A. Ryss, A. S. Smirnova, and E. A. Shuvaev: Wettability and impregnability of carbon materials by coal tar pitch, Tsvetnye Metaly, No. 2 (1966), Soviet Union. **252**

I. G. Martyushin and V. V. Kharakoz: Relationship between the first stage of fluidization and a rheological transformation in a bed of solid granular material, Izvestiya Vysshikh Uchebnykh Zavedenii SSSR, Khimiya i Khimicheskaya Tekhnolgiya, No. 5 (1966), Soviet Union. **255**

Yu. A. Avdonin, V. M. Olevskii, and D. M. Popov: Investigation of mass transfer in tubes with irrigated walls with counterflow of gas, Khimicheskaya Promyshlennost, No. 11 (1966), Soviet Union. **258**

V. A. Malyusov, N. A. Malafeev, and N. M. Zhavoronkov: Investigation of high-velocity cocurrent rectification in a tubular column, Khimicheskaya Promyshlennost, No. 11 (1966), Soviet Union. **264**

Yu. M. Grigor'ev, A. G. Merzhanov, and K. V. Pribytkova: The critical conditions for thermal detonation with conductive heat transfer in the reaction zone and surrounding medium, Prikladnaya Mekhanika i Teknicheskaya Fizika, No. 5 (1966), Soviet Union. **268**

S. M. Dogaru: Instrument for determining the emulsification and solubilizing ability of surface-active agents, Rev. Chim. (Bucharest), No. 1 (1966), Romania. **274**

I. T. El'perin, B. M. Smol'skii, and L. I. Levental: Decreasing the hydrodynamic resistance of pipelines, Inzhenerno-Fizicheskii Zhurnal, No. 2 (February) (1966), Soviet Union. **276**

M. E. Aerov, V. N. Vostrikova, and R. E. Gurovich: A study of the process of rectification drying of hydrocarbons, Khimicheskaya Promyshlennost, No. 4 (1966), Soviet Union. **279**

E. I. Asinovskii and A. V. Kirillin: Experimental determination of the thermal conductivities of argon plasmas, "International Symposium on the Properties and Applications of Low-temperature Plasmas at the 20th International Congress on Theoretical and Applied Chemistry," Moscow (1965), Soviet Union. **281**

S. S. Gluzman and V. N. Krainov: A study of the dynamic properties of the direct digital control system for the ammonia synthesis process, Khimicheskaya Promyshlennost, No. 3 (1966), Soviet Union. **289**

Kh. Kh. Rakhimov, and N. A. Slezkin: Fluid flow in a boundary layer with slip along the wall, Izv. Otd. Fiziko-Tekh. i Khim. Nauk, Akad. Nauk Tadzhikskoi SSR, No. 21 (1966), Soviet Union. **572**

O. M. Todes and Yu. S. Lezin: Dynamics of continuous adsorption and desorption in a fluidized bed with a non-linear isotherm, Khimiya i Tekhnologiya Topliv i Masel, No. 5 (1967), Soviet Union. **577**

Koong Nam Shik, Son Jin Byung, and Kwon Soo Young: Reexamination of the problem of optimizing Denbigh's reaction system by means of the discrete maximum principle, J. Korean Inst. Chem. Engrs., No. 2 (1966), South Korea. **581**

Z. Csüros, J. Petro, and J. Heiszman: Studies with Raney-nickel catalysts. Study of cobalt-, iron-, copper- and manganese-containing catalysts prepared by the alumino-thermic method, Magyar Kemiai Folyoirat, No. 4 (1967), Hungary. **588**

V. S. Nikolaev, K. D. Vachagin, and Yu. N. Baryshev: Film flow of viscous liquids over surfaces of rapidly rotating conical discs, Izv. Vysshikh. Uchebn. Zavedenii, Khim. i Khim. Tekhnol., No. 2 (1967), Soviet Union. **595**

M. I. Fridland: Mass-transfer coefficients in fluidized systems, Khimiya i Tekhnologiya Topliv i Masel, No. 5 (1967), Soviet Union. **598**

L. A. Razumovskii and V. V. Strel'tsov: Study of the process of salt crystallization from solutions in fluidized beds, Izvestiya Vysshikh Uchebnykh Zavendenii SSSR, Khimiya i Khimicheskaya Tekhnologiya, No. 2 (1967), Soviet Union. **604**

I. M. Kovtun, A. N. Naumov, and V. B. Nesterenko: The Stirling cycle in a dissociating gas, Vestsi Akademii Navuk Belaruskai SSR, Seryya Fizika-Tekhnichnykh Nauk, No. 1 (1967), Soviet Union. **608**

A. Teichert and S. Ciborowski: Method of evaluating the resistance of nickel catalysts to sulfur poisoning, Nukleonika, No. 1-2 (1967), Poland. **611**

E. Blasiak and A. Haba: Sinter formation in a fluidized bed during a process involving an exothermic reaction, Chemia Stosowana, No. 4, IB (1967), Poland. **614**

M. Kucharski and J. Stelmaszek: Separation of liquid mixtures by permeation, Przemysl Chemiczny, No. 3 (1967), Poland. **618**

E. P. Skornyakov, I. B. Vainberg, V. S. Tupitsin, and K. I. Sakodynskii: Continuous gas chromatography on a fixed bed of sorbent, Khimicheskaya Promyshlennost, No. 4 (1967), Soviet Union. **622**

O. L. Bruk: Calculation and investigation of multistage sequential washing of sludge, Khimicheskaya Promyshlennost, No. 3 (1967), Soviet Union. **629**

L. S. Gordeev and B. A. Chertkov: Investigation of the steady-state characteristics of a process for obtaining 100% SO_2 from ammonium bisulfite, Khimicheskaya Promyshlennost, No. 2 (1967), Soviet Union. **634**

R. Z. Tudose, T. Saveanu, and G. Cristian: Transfer processes between immiscible liquids. The hydrodynamics of film flow, Buletinul Institutului Politehnic, Iasi, Nos. 3-4 (1966), Romania. **637**

N. A. Olefir, M. E. Levinter, and K. N. Mamaeva: Two-stage utilization of catalyst in catalytic cracking equipment, Neftepererabotka i Neftekhimiya, No. 2 (1967), Soviet Union. **642**

P. Yu. Eidukyavichyus and A. A. Zhukauskas: Solution of the equations of motion for laminar flow of an incompressible fluid about a plate using exponential series, Trudy Akademii Nauk Litovskoi SSR, Seriya B, No. 4 (1967), Soviet Union. **645**

S. Z. Levinson and D. I. Orochko: Staged countercurrent multisectional contactors for continuous adsorptive treatment of petroleum products, Khimiya i Tekhnologiya i Masel, No. 1 (1967), Soviet Union. **649**

T. Hobler and S. Kedzierski: Analysis of the equations of mass transfer in the liquid phase in the flow of liquid down a wall, Chemia Stosowana 4, IB (1967), Poland. **654**

G. Niac: Kinetic method for determination of adsorption isotherms, "Studia Universitatum Victor Babes et Bolyai," Vol. 3, No. 4 (1958), Romania. **666**

D. N. Chaplits, K. D. Samokhvalova, V. M. Sobolev, and I. Ya. Tyuryaev: The dehydration of tert-butyl alcohol in a reactor of novel design, Khimicheskaya Promyshlennost, No. 10 (1966), Soviet Union. **672**

V. N. Martos and V. M. Ryshik: A study of capillary impregnation of porous media as applied to modeling of the process of gas displacement by water, Izv. AN SSR, Mekh. Zhidk. i Gaza, No. 1 (1967), Soviet Union. **676**

B. A. Bel'tsov: Mathematical description of the platforming process, Khimiya i Tekhnologiya Topliv i Masel, No. 8 (1966), Soviet Union. **680**

V. P. Budtov: Investigation of the concentration dependence of the viscosity of dilute polymer solutions. Compression of polymeric chains, Vysokomolekulyarnye Soedineniya, No. 4 (1967), Soviet Union. **684**

I. S. Kochenov and Yu. N. Kuznetsov: Transient flow in tubes, "Teplo- i Massoperenos, Vol. I, Konvektivnyi Teploobmen v Odnorodnoi Srede," Minsk (1965), Soviet Union. **689**

F. Strek and S. Masiuk: Heat transfer in liquid mixers, Chemia Stosowana, No. 4, IB (1967), Poland **693**

J. Madejski: Method of measuring the thermal conductivity of liquid and gaseous dielectrics and its applications, Chemia Stosowana, No. 4, IB (1967), Poland. **702**

R. Z. Alimov: Convective mass transfer during evaporative cooling with an intensely heated surface and two-phase vortex flow, Inzhenerno-Fizicheskii Zhurnal, No. 5 (1967), Soviet Union. **720**

R. Mizushima, R. Ito, and H. Miyashita: Experimental study of an evaporative cooler, Kagaku Kogaku 31, No. 5 (1967), Japan. **727**

H. Tanji, M. Uchiyama, A. Amano, and H. Tokuhisa: Thermal dehydrogenation of cyclopentene. Studies of the pyrolysis of cyclopentene, Kogyo Kagaku Zasshi 70, No. 3 (1967), Japan. **732**

Y. Takemura, Y. Morita, and K. Yamamoto: Oxidation and reduction of nickel oxide-alumina type catalysts, Kogyo Kagaku Zasshi 70, No. 3 (1967), Japan. **737**

K. Suga, Y. Morita, E. Kunugita, and T. Otake: Deterioration of catalysts for the dehydrogenation of n-butane due to diffusion in particles, Kogyo Kagaku Zasshi, No. 2 (1967), Japan. **742**

C. Kawashima, N. Setaka, and J. Nakagawa: Silicon carbide coatings by vapor-phase reaction at high temperature. Fundamental studies on chemical vapor deposition. Part i, Yogyo Kyokai Shi, No. 2 (1967), Japan. **749**
